

MAKE SENSE OF, REMOTELY LOCATED ROOMS, BUSINESSES, OFFICES, KIOSKS

A box of wireless sensors to monitor the ambient condition of any space, from anywhere anytime. Security & customer satisfaction ensured. Ideal for classrooms, retail chains, path labs, clinics, and meeting rooms too.

Wireless Sensors

- Measure Air Quality inside the rooms and spaces
- Detect whether the door is open or closed
- Find out if there are people inside the room
- Monitor Temperature & Humidity of Freezers
- Smart Button for SOS or Emergency situations
- People attendance ID Card (Optional)
- Footfall count (Optional)

How does it work?

Wireless sensors acquires the condition data of remotely located rooms, offices, stores and offices placed there. A Wi-Fi based transmitter there aggregates these data and sends to the secure cloud based IOT platform. From your head office you can monitor the conditions or each of these locations, and get alerted for any abnormal condition. It works 24X7. Once setup, works for 5 years.

What is in the Box

Smart Sensors

Smart Wireless Sensors, designed, developed and manufactured by Black Box acquire precision condition data. SOS Smart Button is for emergencies.

SpaceSense App & Web

Cloud based IOT platform provides you customized central dashboard to monitor 1000+ locations centrally. Alerts you for any abnormalities noted.

Easy To Setup & Customize

It takes just 30 minutes to setup any location. Customize your CXO dashboard by just drag & drop. Mobile Apps for Alerts & Monitoring from anywhere, anytime.
